

CLASSIFICATION OF CROPS GROWN IN PAKISTAN A RESEARCH CONDUCTED BY
ALLAH DAD KHAN PPD CMPII NWFP COMPONENT

Crops are grown the world over, and vary depending upon the land quality of a country and the export value. Crops are plants that are grown for different purposes, from food for humans and livestock to fuel, medicines and non-food products for everyday use such as paper. Not all crops are for the greater benefit of human kind (for instance, cocaine and opium are also crops), but others are essential to our survival. You may not think of wood as a crop, for instance, but it is. Here we'll look at just some of the many different types of crops (excluding fruits and vegetables) that exist.

1.Cereal Crops (Grain and Grass and Seed Crops)

2.Oilseed Crops

3.Pulses Crops (Leguminous Crops)

4.Fibre Crops

5. Sugar Crops

6.Fodder Crops

7. Beverage Crops

8. Cash Crops

9.Other Crops

1. Cereal Crops (Grain and grass and Seed Crops)

1. Wheat

2. Maize

3. Rice

4. Sorghum

5. Barley

6. Rye

7. Oat

8. Millett

2. Oilseed crops

1. Ground Nut

2. Castor bean

3. Linseed

4. Sesame

5. Soybean

6. Mustard

7. Rape Seed

8. Safflower

9. Sunflower

10. Canola

3. Pulses Crops(Leguminous Crops)

1. Beans

2. Broad Beans

3. Chick Pea

4. Cowpeas

5. Peas

6. Pigeon Pea

7. Moong

8. Mash

4. Fiber crops

1. Cotton
2. Jute
3. Kenaf
4. Flax
5. Hemp

5.Sugar Crops

1. Sugar Cane
2. Sugarbeet

6.Fodder Crops

1. Sorghum
2. Millett
3. Lucern (alfalfa)
4. Shaftal
5. Berseem
6. Oat

7.Beverage Crops

1. Tea

8.Cash Crops

1. Tobacco

9. Other Crops

1. Coconut

2. Olive
